

May 6, 1969

Mr. Dominick J. Olivero
89 Marlborough Street, Apt. 11
Boston, Massachusetts 02116

Dear Mr. Olivero:

Dr. Lederberg asked me to send you some of his representative writings in non-technical areas. At present he has nothing in book form, but he is planning to publish a book, probably in the next year, which includes many of his columns for the Washington Post plus other writings. His column "Science and Man" has appeared weekly in the Washington Post*since July 1966, and I am enclosing a few samples of that.

I hope this material will help provide some additional background for you.

Sincerely yours,

Secretary to Dr. Lederberg

* Syndicated to several other papers, among them, for a while, The Boston Globe.
